

Carefully unpack and identify all parts before beginning assembly.

1. Lay Resin, with holes side facing up, on a non-abrasive and elevated surface.
2. Lay Glass Mirror face down on top of Resin. Make certain Glass Mirror is centered within Frame.
3. Secure Metal Tabs onto Frame with Screws, securing Glass Mirror in place.
4. At desired wall location, install two picture frame hangers or screws (not included) into wall at corresponding position with hanging loops on back of mirror frame.

NOTE: Use a level to insure mounting position is horizontal. Check certain the picture hangers or screws are securely fastened onto wall to adequately support the weight of the mirror. If not certain, consult a qualified technician.

5. Carefully hang mirror frame onto wall.
